

PRESS RELEASE

Kverneland Group Introduces the Kverneland Taarup 4300 Series Trailed Disc Mower Conditioner Range.

20.02.2011: Kerteminde, Denmark

Kverneland Taarup 4332 LT

An Update Based on Extensive Experience

The Kverneland Taarup 4300 series is an update of the well-proven 4200 series, including the established features such as SemiSwing conditioner, low maintenance cutterbar, SuperFloat suspension, BX AutoSwather belt, FlipOver wide spreading and ProFit quick knife change.

All machines have received an update on the left hand side guard, to allow easier folding for transport, as well as a revised drawbar design, which offers better protection of hoses and wiring as a result of a removable top guard.

A wealth of models and an array of modular configurations makes the 4300 series machine the ideal solution for an extensive range of applications and allows the machines to be tailored to specific needs.

SemiSwing – The Conditioner with A Little More Bite!

The Kverneland Taarup SemiSwing steel tine conditioner, which combines the best of aggressive conditioning and protection of the tines into one solution, has now been in operation for several years and is still a key feature on the 4300 series, showing significantly reduced operating costs.

SuperFloat – Improved and Fine Tuned to Perfection!

The trailed mower conditioner from Kverneland Taarup is known for its excellent ground contour following ability and not least protection of the cutterbar. The 3 frame SuperFloat solution, where the cutterbar alone will pivot over small obstacles in the field, and thus reduce the load on the complete machines, is passed on to the new 4300 series. The two long and heavy suspension springs ensure an even and consistent ground pressure over the whole cutterbar. The ground pressure is stable even in very uneven conditions, resulting in far less skid wear and stubble damage.

The 4300 series machines are offered in four working widths ranging from 2.8 to 4.0 m and with the choice of either side mounted or centre mounted drawbar. Add to this either SemiSwing or chevron roller conditioning and you have a range for any job.

Kverneland Taarup 4300 series – Specifications in Brief:

	4328 LT	4332 LT	4332 CT	4332 LR	4336 LT	4336 CT	4336 LR	4336 CR	4340 CT
Working Width	2.80 m	3.20 m	3.20 m	3.20 m	3.60 m	3.60 m	3.60 m	3.60 m	4.00 m
Transport Width	2.70	3.00	3.00	3.00	3.40	3.40	3.40	3.40	3.80
Number of Discs	7	8	8	8	9	9	9	9	10
